

04/06/2013

The fund is the primary vehicle for the investment of our capital. Its current traits are:

- Highly stock specific investments that are concentrated in our few key ideas;
- The key ideas generally relate to companies that are not well known or popular investments;
- The fund currently has a significant USD and Euro exposure as a result of individual equity investments in these geographies;
- There is a meaningful mid cap / micro cap bias to the investments;
- Managed with consideration of tax for Australian investors; and
- An outcome of the direct short and Yen positions is that the fund has a meaningful short exposure to rising interest rates.

Returns	Fund
Since inception (annualised)	11.0%
Since inception (cumulative)	39.1%
Rolling 3 year (annualised)	11.9%
Rolling 1 year	30.2%
