The fund is the primary vehicle for the investment of our capital. Its current traits are:

- Highly stock specific investments that are concentrated in our few key ideas;
- The key ideas generally relate to companies that are not well known or popular investments;
- The fund currently has a significant USD and Euro exposure as a result of individual equity investments in these geographies;
- There is a meaningful mid cap / micro cap bias to the investments;
- Managed with consideration of tax for Australian investors; and
- An outcome of the short and Yen positions is that the fund has a meaningful short exposure to rising interest rates.
